tutorial**

Bo Peng

**Forward-time  
simulations**

**What is  
simuPOP**

**Forward-time  
population  
generation**

**simuPOP  
components**

**A real  
example**

- 1 **Forward-time simulations**
- 2 **What is simuPOP**
- 3 **Forward-time population generation**
- 4 **simuPOP components**
- 5 **A real example**

# Why population genetics simulations are needed

simuPOP  
tutorial

Bo Peng

Forward-time  
simulations

What is  
simuPOP

Forward-time  
population  
generation

simuPOP  
components

A real  
example

- High cost of genetic data collection  
Simulations are relatively inexpensive

# Why population genetics simulations are needed

simuPOP  
tutorial

Bo Peng

Forward-time  
simulations

What is  
simuPOP

Forward-time  
population  
generation

simuPOP  
components

A real  
example

- High cost of genetic data collection  
Simulations are relatively inexpensive
- Inaccessibility to ancestral information  
Simulations can simulate very long evolutionary process

# Why population genetics simulations are needed

simuPOP  
tutorial

Bo Peng

Forward-time  
simulations

What is  
simuPOP

Forward-time  
population  
generation

simuPOP  
components

A real  
example

- High cost of genetic data collection  
Simulations are relatively inexpensive
- Inaccessibility to ancestral information  
Simulations can simulate very long evolutionary process
- Complexity of real-world genetic effect  
Simulations can control the number and genetic effects of disease susceptibility loci (DSL)

# Two major simulation methods

simuPOP  
tutorial

Bo Peng

Forward-time  
simulations

What is  
simuPOP

Forward-time  
population  
generation

simuPOP  
components

A real  
example

## Backward-time

- Start from a sample with unknown genotype
- Coalesce individuals until the most recent common ancestor of all individuals is found
- Starting from the MRCA, proceed forward in time and fill the genotype of each individual

# Two major simulation methods

simuPOP  
tutorial

Bo Peng

Forward-time  
simulations

What is  
simuPOP

Forward-time  
population  
generation

simuPOP  
components

A real  
example

## Backward-time

- Start from a sample with unknown genotype
- Coalesce individuals until the most recent common ancestor of all individuals is found
- Starting from the MRCA, proceed forward in time and fill the genotype of each individual

## Forward-time

- Start from an initial population
- Evolve forward in time, generation by generation, subject to certain number of genetic and/or demographic effects
- Samples are collected from the last several generations

# Comparison between forward- and backward-time simulations

simuPOP  
tutorial

Bo Peng

Forward-time  
simulations

What is  
simuPOP

Forward-time  
population  
generation

simuPOP  
components

A real  
example

## Backward-time

- Sample based, efficient.

## Forward-time

- Population based, inefficient.

# Comparison between forward- and backward-time simulations

simuPOP  
tutorial

Bo Peng

Forward-time  
simulations

What is  
simuPOP

Forward-time  
population  
generation

simuPOP  
components

A real  
example

## Backward-time

- Sample based, efficient.
- Limited selection, recombination models and mating schemes

## Forward-time

- Population based, inefficient.
- Can simulate almost arbitrary evolutionary scenarios

# Comparison between forward- and backward-time simulations

simuPOP  
tutorial

Bo Peng

Forward-time  
simulations

What is  
simuPOP

Forward-time  
population  
generation

simuPOP  
components

A real  
example

## Backward-time

- Sample based, efficient.
- Limited selection, recombination models and mating schemes
- Can not study population properties, or properties of ancestral generations

## Forward-time

- Population based, inefficient.
- Can simulate almost arbitrary evolutionary scenarios
- Can study population properties and ancestral generations

# Comparison between forward- and backward-time simulations

simuPOP  
tutorial

Bo Peng

Forward-time  
simulations

What is  
simuPOP

Forward-time  
population  
generation

simuPOP  
components

A real  
example

## Backward-time

- Sample based, efficient.
- Limited selection, recombination models and mating schemes
- Can not study population properties, or properties of ancestral generations
- Used mostly for sample generation

## Forward-time

- Population based, inefficient.
- Can simulate almost arbitrary evolutionary scenarios
- Can study population properties and ancestral generations
- Wider application area

# On the simulations of complex human diseases

simuPOP  
tutorial

Bo Peng

Forward-time  
simulations

What is  
simuPOP

Forward-time  
population  
generation

simuPOP  
components

A real  
example

## Backward-time

- Haploid simulation only

## Forward-time

- No limit on ploidy

# On the simulations of complex human diseases

simuPOP  
tutorial

Bo Peng

Forward-time  
simulations

What is  
simuPOP

Forward-time  
population  
generation

simuPOP  
components

A real  
example

## Backward-time

- Haploid simulation only
- Additive selection and penetrance models

## Forward-time

- No limit on ploidy
- Arbitrary selection and penetrance models

simuPOP  
tutorial

Bo Peng

Forward-time  
simulations

What is  
simuPOP

Forward-time  
population  
generation

simuPOP  
components

A real  
example

## Backward-time

- Haploid simulation only
- Additive selection and penetrance models
- One disease susceptibility locus

## Forward-time

- No limit on ploidy
- Arbitrary selection and penetrance models
- Multiple DSL with interaction

# On the simulations of complex human diseases

simuPOP  
tutorial

Bo Peng

Forward-time  
simulations

What is  
simuPOP

Forward-time  
population  
generation

simuPOP  
components

A real  
example

## Backward-time

- Haploid simulation only
- Additive selection and penetrance models
- One disease susceptibility locus
- Generate independent samples

## Forward-time

- No limit on ploidy
- Arbitrary selection and penetrance models
- Multiple DSL with interaction
- Simulate populations, which allows more flexible sampling

Forward-time  
simulations

What is  
simuPOP

Forward-time  
population  
generation

simuPOP  
components

A real  
example

## A forward-time population genetics simulation **environment**

- A population genetics simulation program
- Not coalescent-based
- Based on an object-oriented scripting language (Python)

# What simuPOP can do

simuPOP  
tutorial

Bo Peng

Forward-time  
simulations

What is  
simuPOP

Forward-time  
population  
generation

simuPOP  
components

A real  
example

simuPOP provides

- a large number of objects and functions to manipulate populations,  
copy, split, merge, save, load, modify genotype,  
determine affection status, generate sample, ...
- and a mechanism to evolve populations forward in time  
subject to all sorts of demographic and genetic forces  
such as population size changes, mutation, migration,  
selection...

# Why is simuPOP needed?

**simuPOP  
tutorial**

Bo Peng

**Forward-time  
simulations**

**What is  
simuPOP**

**Forward-time  
population  
generation**

**simuPOP  
components**

**A real  
example**

# How to use simuPOP

simuPOP  
tutorial

Bo Peng

Forward-time  
simulations

What is  
simuPOP

Forward-time  
population  
generation

simuPOP  
components

A real  
example

Just like R/S-Plus or Matlab, you can

- Interactively manipulate populations and evolve them
- Write a script (in Python)
- Run existing script

# Partial feature list

simuPOP  
tutorial

Bo Peng

Forward-time  
simulations

What is  
simuPOP

Forward-time  
population  
generation

simuPOP  
components

A real  
example

- Scripting language...
- Binary, short and long allele types
- Arbitrary demographic changes
- 60+ operators supporting all sorts of

# Oohm, Python??

simuPOP  
tutorial

Bo Peng

Forward-time  
simulations

What is  
simuPOP

Forward-time  
population  
generation

simuPOP  
components

A real  
example

The core of simuPOP is written in C++, and is provided (wrapped) as Python modules.

- Python is easy to learn
- Python is easy to write and maintain
- Python is
